

# ISC Test 1

Duration: 2 HRS

*Please read and follow the instructions carefully*

Using what you've learned in class so far, implement the provided design.

Implementation steps:

1. Create a github repository called **isc-test-one**
2. Clone the repository to your local machine
3. Create the navigation bar with the logo
4. Add a commit with message **Added navigation bar**
5. Implement the banner (the section right after the navigation bar)
6. Add a commit with message **Implemented Banner**
7. Implement the **About the big blue section**
8. Add a commit with message **Implemented About Us section**
9. Create the Our process section without image
10. Add a commit with message **Setup our process section**

11. Add image to our process section
12. Add a commit with message **Add image to our process section**
13. Create the last section of the site without the background
14. Add a commit with message **Add CTA section**
15. Add a gradient background to the CTA section
16. Add a commit with message **Add gradient bg to CTA section**
17. Push your local changes to online repository
